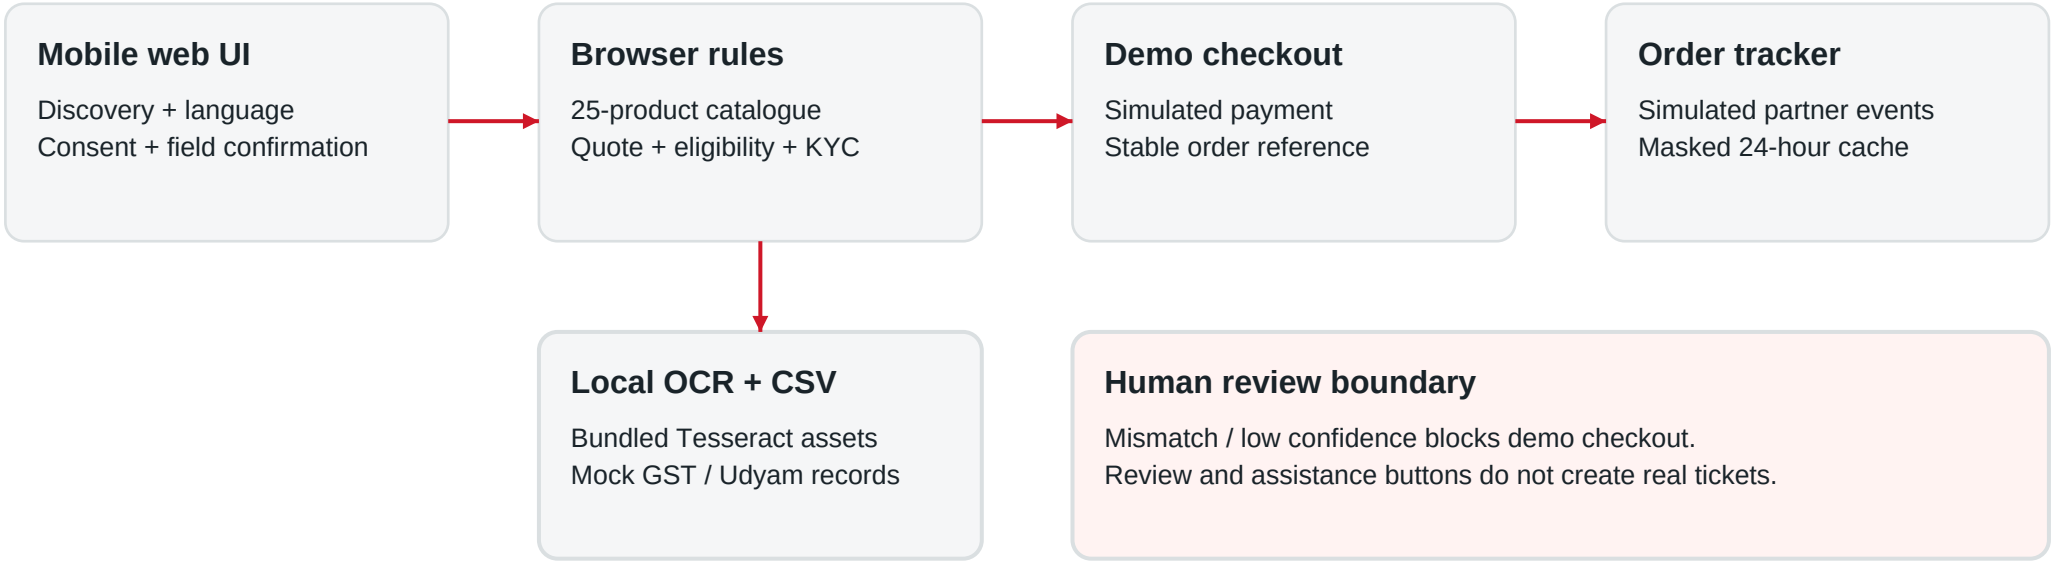
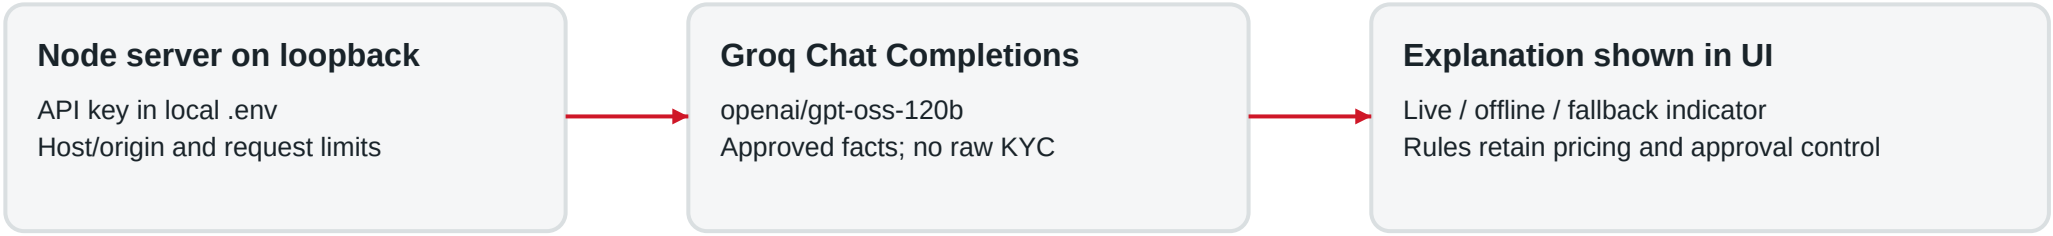
Udyam Digital: implementation architecture

test_case / IIIT-DELHI | Solid lines show implemented data flows. Synthetic identity data. Updated 5 November 2026.

BROWSER: OFFLINE DEMO PATH



OPTIONAL LIVE GENAI: LOCAL SERVER ONLY



Alternative: OpenAI Responses (store:false). Groq does not send store:false; provider/account retention terms apply.

Production work: authenticated server decisions, protected storage, audit, real KYC/payment/CRM adapters and retention policy.

The private static preview uses offline rules. Live AI requires the local Node server and a configured team API key.
